

Matthew Norman Wind, Modern Skeleton Clock

A Swiss-made high quality mechanical clock by Matthew Norman. A photograph does not do justice to the subtle sobriety which rises from the all black, round, aluminium cabinet and the skeletonized movement of this so called "Wind" clock.

The captivating new design combines the satin-finish, black, aluminium case sides with shiny angles and the impression of floating wheels.

The heart of the clock displays a strong contrast between the black plates incorporating the black skeletonised dial and the palladium-coated gear chain.

Swiss Made Caliber 1754 18-jewelled, 8-day mechanical movement, the brass plates with black-coating, and with horizontal balance.

The dial has Arabic numerals for 2, 4, 8 and 10.

Mineral glasses on both sides.

Diameter: 148mm

Height: 52 mm

Guaranteed for 3 years.

Our price includes delivery within the UK mainland, and we are happy to quote for shipping worldwide.
