

BU012 Bulle Insulating Washer Set

A set of four plastic insulating washers.

These washers are essential for insulating the movement from the rest of the frame in a Bulle clock. There are two shouldered washers and two flat washers. The shouldered ones sit behind the movement with the shoulders protruding into the holes in the movement plate. The flat ones sit on the outside.

The price is per set of 4, and includes VAT & recorded delivery within the UK.
